THE DOG HOUSE · INDEPENDENT GUIDE

Inside the demo spin sample

Observed wins, natural features and bought bonuses across the series.

9
games measured

33300
settled paid rounds

700
completed bought features

Test window: 2026-11-12 to 2026-11-13 UTC

Generated 2026-11-16 UTC · playthedoghouse.com

18+ | Gambling involves risk. Set limits, take breaks and never chase losses. Demo credits have no cash value.

THE SAMPLE AT A GLANCE

All-game summary

Base paid-round results include each naturally triggered feature once. Bought features are separate. All payouts below are gross multiples of the base stake.

Game	Settled paid	Hit rate	Stake or more	Mean x stake	Best x stake	Natural features
The Dog House	3700	28.46%	11.68%	1.088	566.15	17
The Dog House Megaways	3700	23.27%	10.22%	1.038	504.00	10
The Dog House Dice Show	3700	26.35%	11.49%	0.899	378.85	18
The Dog House Muttley Crew	3700	20.35%	11.03%	0.905	246.00	12
The Dog House Multihold	3700	24.51%	9.19%	0.723	322.35	20
The Dog House Dog or Alive	3700	16.76%	9.73%	0.728	315.60	16
The Dog House Megaways 1000	3700	24.03%	9.46%	0.812	199.00	8
The Dog House Royal Hunt	3700	29.38%	12.38%	1.053	982.25	17
The Big Dog House	3700	26.24%	10.32%	1.400	1242.75	21

What the table measures

A hit pays anything above zero. Stake-or-more counts payouts that meet or exceed the original paid stake. A hit can still leave the round below its cost.

What it cannot establish

This finite demo sample is not theoretical RTP, a forecast, or evidence that one game will perform better in future play.

> Virtual USD credits only. No real-money play, account or deposit was involved. Read the exclusions and limitations before comparing results.

HOW THE SAMPLE WAS COLLECTED

Method & exclusions

Pragmatic Play public demo server, driven through the game interface.

Paid rounds and settlement

Browser-generated gameService responses supply the results. The collector uses each game's minimum stake, with ante off. It accepts only completed rounds reconciled against the returned virtual balance. It never fabricates a payout from an animation.

Base paid-round payout includes the trigger and the complete natural feature once. A separate natural-feature row describes that same event; it is not added again. Bought bonuses form an independent sample and never enter the base figures.

Setting / coverage	Recorded value
Currency	USD virtual credits
Minimum stake per game	The Dog House: 0.20 USD The Dog House Megaways: 0.20 USD The Dog House Dice Show: 0.20 USD The Dog House Muttley Crew: 0.20 USD The Dog House Multihold: 0.20 USD The Dog House Dog or Alive: 0.20 USD The Dog House Megaways 1000: 0.20 USD The Dog House Royal Hunt: 0.20 USD The Big Dog House: 0.20 USD
Test window	2026-11-12 to 2026-11-13 UTC
Source summary generated	2026-11-13T13:11:03.470018+00:00

Unknown outcomes stay unknown

Ambiguous charged requests are archived and never replayed. No unknown payout is treated as a zero win. Earlier validation samples are outside this full sample.

Game	Origin / reason	Excluded outcomes
The Dog House Multihold	bought / network	1
The Big Dog House	bought / network	1

All other games have no listed full-sample exclusions. The completed base samples are intact. Excluding unknown bought outcomes may censor bought-feature statistics even when the requested settled sample was completed.

INDIVIDUAL GAME RESULTS

The Dog House

Minimum stake: 0.20 virtual USD · Settled paid n = 3700

Hit rate	Stake-or-more rate	Average paid-round win

COMPARE THE OBSERVATIONS

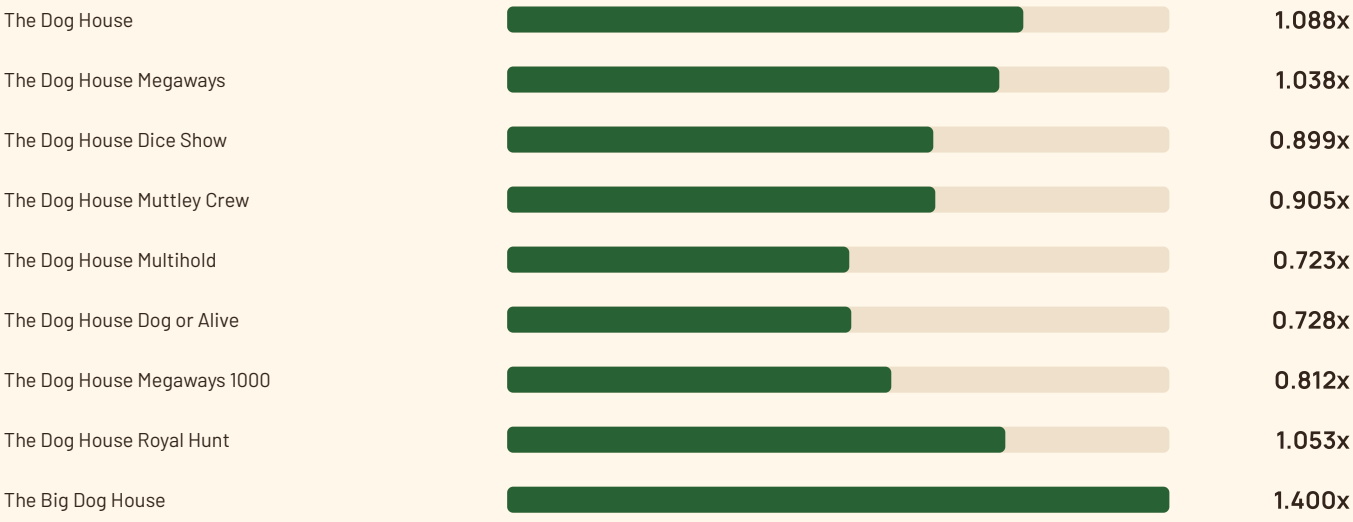

Hits & average payouts

Every game uses its own settled minimum-stake sample. Bar lengths are relative within each chart; the printed values carry the measurement.

Hit rate · any positive payout

Average paid-round payout · x base stake

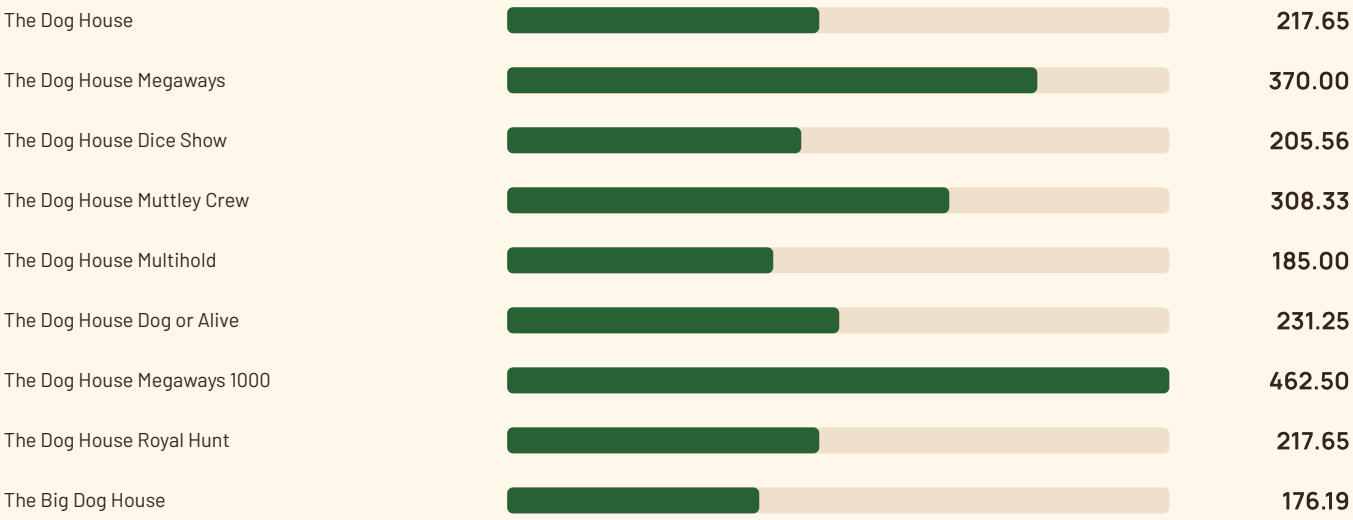

A frequent hit can be smaller than the stake. A rare large feature can move the mean sharply. These are descriptive comparisons, not rankings or predictions.

FEATURES STAY SEPARATE

Natural & bought features

Natural frequency · paid rounds per trigger

A smaller observed value means more frequent triggers in this sample.

Bought features · sampled purchase price only

Game	n	Cost x stake	Mean payout x stake	Median payout x stake
The Dog House	0	not measured	not measured	not measured
The Dog House Megaways	100	100	105.65	57.00
The Dog House Dice Show	0	not measured	not measured	not measured
The Dog House Muttley Crew	100	100	83.90	37.38
The Dog House Multihold	100	100	68.17	26.23
The Dog House Dog or Alive	100	100	73.43	22.15
The Dog House Megaways 1000	100	100	75.76	51.72
The Dog House Royal Hunt	100	100	105.04	39.85
The Big Dog House	100	100	84.75	33.48

Payout multiples use the base stake, not the purchase price. They are gross returns, not profit. Megaways feature-choice results are pooled as documented on their game pages; higher-price modes are not measured.

READ THE EVIDENCE IN CONTEXT

What this test can tell us

A demo sample is not RTP

The reported averages describe these settled outcomes. They do not estimate theoretical long-run RTP reliably, establish fairness, or predict the next spin. We make no claim about future or real-money returns.

Small feature samples

Natural bonuses are rare within the paid sample. Bought features cover only the documented lowest-price purchase and observed choice mix. Large payouts can dominate the mean; the median describes a different aspect of the same finite sample.

Unknown payouts and censoring

Some bought rounds lost their charged response to network failure. Those payouts remain unknown and were excluded without a zero assignment. Continuing until the settled sample was complete does not remove the risk of selection bias.

Demo differs from real-money play

Virtual credits have no cash value. Availability, configurations and game behaviour can differ across contexts or change over time. This study is not a recommendation to gamble or buy a feature.

Comparable units, limited scope

Minimum-stake play and multiples of the base stake make units consistent. Different feature mechanics and choice mixes remain distinct. No higher-price modes, real-money transactions, or separate feature-choice payout estimates are measured.

> Treat the report as a transparent record of a defined observation window. Use the sample counts, exclusions and method together with every result.

REFERENCE

Glossary

Base paid round

A charged ordinary spin, including any continuation and naturally triggered feature payout, settled once.

Hit rate

The share of settled paid rounds with any positive payout. A hit can pay less than the stake.

Stake-or-more rate

The share of settled paid rounds whose gross payout meets or exceeds the paid stake.

x base stake

Gross payout divided by the base stake. For bought features this is not a multiple of the buy price.

Natural bonus

A feature triggered during a base paid round. Its payout is already included in the base sample.

Bought bonus

A separately purchased feature. It is excluded from base paid-round figures.

Mean / median / best

Arithmetic average / middle ordered payout / largest observed payout. Best is a sample maximum, not a game limit.

n / settled / excluded

Sample count / completed and reconciled outcome / unknown outcome kept outside the metrics.

Paid rounds per natural bonus

Settled paid sample count divided by natural feature count. A descriptive frequency, not a schedule or guarantee.
